

Receipt scanner kaise kholein aur kaise istemat karein

ReceiptIQ kholne ke do tareeqe

Do addresses hain. Dono ek hi application kholte hain aur ek hi data dikhate hain - sirf server tak pahunchne ka raasta alag hai. Jo aapki soorat-e-haal se milta ho, wahi istemat karein.

Aapki soorat-e-haal	Kaunsa address
Company VPN se jure hue hain	http://10.0.2.2:8002
VPN band hai, ya aap daftar se bahar kaam kar rahe hain	https://stayed-finder-present-audit.trycloudflare.com

VPN wala address zyada tez hai kyunki traffic daftar ke network ke andar hi rehta hai. Agar wo na khule to dekh lein ke VPN juda hua hai ya nahi - wo address sirf VPN ke andar maujood hota hai.

Login karna

1. Upar diye gaye do me se koi ek address browser me kholein.
2. Jo username aur password aapko diya gaya hai, wo daalein.
3. Sign In dabayein.

Receipts scan karna

1. Choose Files dabayein, ya apni receipts ko upload box par drag kar ke chhor dein.
2. Ek waqt me 5 receipts tak daal sakte hain. JPG, PNG, WEBP, GIF aur PDF chalte hain, har ek 10 MB tak.
3. Analyze dabayein. Har receipt pehle Queued, phir Analyzing, phir Done hoti hai.
4. Natije ek ek kar ke aate rahenge jaise jaise har receipt mukammal hoti hai. Poore batch ka intezaar karne ki zaroorat nahi.
5. Upar kisi receipt ke naam par click kar ke us ki tafseel dekhein: dukaan, tareekh, items aur total.

Receipts parhi ja rahi hon to bhi aap browser band kar sakte hain. Kaam server par chalta rahega, aur wapas aane par natije History me mojood milenge.

Purani receipts dekhna

Upar wali patti me History par click karein. Jo bhi receipts kamyabi se process hui hain, sab wahan darj hoti hain - nayi sab se upar. Kisi bhi row par click kar ke us ki पूरी tafseel dobara khul jayegi.

Agar kuch kaam na kare

Aapko kya nazar aata hai	Kya karein
VPN wala address nahi khul raha	Dekh lein ke VPN juda hua hai. Agar VPN istemal nahi kar sakte to doosra address kholein.
Doosra address nahi khul raha	Ye address har baar badal jata hai jab server restart hota hai. IT se naya address maang lein.
Kisi receipt par failed likha hai	Screen par wajah likhi hoti hai. Aksar scan bohat dhundhla ya chhota hota hai - saaf tasveer lein.
Receipt Queued par ruki hui hai	Server masroof hai ya abhi restart hua hai. Ek minute dein, phir page refresh karein.

Jaan lene wali baatein

- Receipts ko wo model parhta hai jo company ke apne server par chalta hai. Kuch bhi kisi bahar wali company ya online service ko nahi bheja jata.
- Ek receipt aam taur par chand seconds leti hai. Lambi ya zyada tafseeli page me thora zyada waqt lag sakta hai.
- Agar dukaan ka naam khali aaye to matlab chhapai itni halki thi ke model parh nahi paya. Baqi receipt phir bhi mehfooz rehti hai.
